PROFILE

Founder and CEO of ATAS (Alliance for Transformative AI Systems), a Kigali-based AI research and product company building infrastructure that understands Rwanda - its languages, geography, and everyday realities. Leads the work end to end: choosing the problems, directing research, shaping products, and taking them into real use.

SELECTED WORK

ATAS

Founder & CEO | 2025 - present

A Rwanda-first AI research and product company. Research and product run as one pipeline, from original language and contextual intelligence work to systems people can use.

AcademiaPlus

Active product | national education infrastructure

National curriculum infrastructure for Rwandan secondary education, bringing curriculum coverage, real exam evidence, and learning insight into one system. Entering its first schools.

IMIZI

Long-term research program

Contextual intelligence infrastructure for understanding Rwandan places, language, and lived context natively - a foundation for the systems built on top of it.

Kinyarwanda language technology

Original language research

Speech and language research built natively for Kinyarwanda, as a foundation for products that must understand Rwanda.

BACKGROUND

Started building software in secondary school in Rwanda, learning through self-directed work and real constraints. Founded ATAS in 2025 to build AI capability Rwanda can own.

IRANKUNDA Elyssa

Founder & CEO of ATAS | Kigali, Rwanda
